

Senior Web Developer

Synergy is looking to add a Sr. Web Developer to our Digital team. The successful candidate is a Ruby on Rails focused full stack developer that is equally proficient in client side, front-end as with back end, server side. The Developer should be a free thinker with an eye for detail, capable of working independently or on a team on a variety of challenging projects.

REQUIREMENTS

- 5+ years Ruby on Rails, Python, PHP
- 7+years developing enterprise level web applications
- Heavy Javascript (Coffeescript, jquery, Nodejs, Phantomjs, etc)
- Exceptional front-end experience (HTML/CSS, Bootstrap, UX/UI)
- Full project lifecycle experience including requirements, architecture, implementation/development, deployment and support
- Previous experience building highly available n-tier web applications and systems
- Database / no-Sql (Mysql, Postgress, Mongodb)
- Sysadmin experience for server setup / network architecture
- Self-starter, self-motivated, and able to work a project from inception to completion with minimal supervision and oversight
- Highly organized and makes every effort to write clean, concise, well documented code
- Ability to quickly learn new technologies and adapt to/adopt them where needed
- Detail-oriented, possess a critical eye
- Excellent communication skills
- Ability to work from the office in Lombard (this is NOT a remote position)
